

## CMF - E

The CMF-E frame is a simple and easy to mount frame for measuring the vertical strain in concrete cylinder in accordance with the ASTM-C469-02 standard. Not only it can be connected to general data loggers, by using our AL series data logger, calculation of the elastic modulus will perform automatically.

### Specifications:

- Dimensions: 220\*290
- Weight: 1.5Kg
- Displacement sensor course: 10 mm
- Displacement sensor accuracy: 1  $\mu$ m
- In accordance with the ASTM-C469-02
- Suitable for 30\*15 cylinders
