***DL Series***

***Digital Data Logger***

## ▶ DL-XX

### Digital Data Logger

## ▶ Key Features

- 7 Inches 800x480 pixel color display with resistance touch screen
- Processor: 32-bit ARM Cortex M4, up to 140 MHz
- UP to 64 analog input channels with 24-bit resolution
- Programable internal signal amplifier for each channel individually (up to 128X)
- Sampling and logging rate: Up to 10 s/sec
- Various excitation DC voltage available on input socket (10V, 5V, 2.5V)
- Ethernet port for PC or network communication
- Internal calibration formula for 4...20 mA, mV/V, K and T type thermocouple and strain gauges as well as standard point, multi point and equation calibration method
- Saved data as CSV format on external standard USB memory stick
- Remote access over the local network (remote access over the Internet is optional)
- Standalone operation
- Windows, Android and IOS user friendly software
- Capability to increase/decrease input channel according to order
